

# Extraordinary People

... personalized care

*"Dear Connie: Thank you! You are a very thoughtful and caring person! Good health and love to you and yours." – A grateful patient*

*Many a patient has started to feel better the moment Connie provided a fluffed pillow, warm blanket or a hot shower. She calls these special touches "all the good things in life," and she is adept at sensing just when to offer them.*

*Connie says, "I feel like I have the best job in the hospital. People who are scared or recovering from surgery – I simply make them comfortable and make new friends. An entire team of healthcare professionals is involved in each person's care, and I'm proud to be part of it."*
