

Extraordinary People

... personalized care

If you ask Ed what's new, he will tell you all about the 256-slice Siemens Flash CT scanner. He's justifiably proud of it and the role that Diagnostic Imaging CT has in the healing process.

Ed says, "Whether it is an accident, long-time discomfort or a sudden find in a doctor's office, it's rewarding to know we help the physicians locate their patients' ailments. YVMC helps us as technologists by purchasing state-of-the-art equipment that increases diagnostic value and puts patient safety first.

"Our patients can have confidence that the best technology is here for them. It is an easy decision to work here when technology and patient care come first!"

Ed Havel, R, CT, MR
Lead CT Technologist
