

# Extraordinary People

**JoAnne Lewis, RN**  
Family Birth Place nurse

## ... personalized care

*Every day at the Family Birth Place holds the possibility that JoAnne could help welcome a new life into the world. That is one of many reasons why her job remains fresh and exciting after almost 32 years at our hospital.*

*JoAnne says, "We are very family-centered, caring for the entire family and not just 'a patient.' I work in the nursery, help through labor and delivery, then take care of mother and baby and prepare the family to go home.*

*"We have such a great group of people who work here in a supportive team environment. I love providing care, educating the family and assisting with breastfeeding. I have even cared for several moms and dads I helped deliver as newborns."*
