

Extraordinary People

... personalized care

With 31 years of bedside nursing and leadership experience at our hospital, Kathy skillfully communicates among doctors and nurses, organizes assignments and guides patient care.

Kathy says, "It's like being an air traffic controller, staying focused and thinking clearly despite being pulled in many directions with constant interruptions. Nursing is a challenging job, and I try to help our nurses to the best of my ability."

"I've had many rewarding moments, working in emergency, long-term and acute nursing, being assistant director, teaching CPR and ACLS, and serving on the Ethics Committee. It's nice to be appreciated for my longevity and skills."

Kathy Curcio, RN
*ICU/Medical-Surgical Nurse
Charge Nurse*
