

Extraordinary People

Rachel Murphy
Family Birth Place
OB Tech

... personalized care

Rachel Murphy could be described as the eyes and ears of the Family Birth Place. As an OB tech, doctors, nurses, moms and newborns rely on her to provide assistance with clinical care and clerical duties.

Rachel says, "What I really like is that every delivery is a story a mother will tell for the rest of her life, and every person's story is different. At the Family Birth Place we get to be a part of what can be one of the happiest moments a couple is ever going to experience.

"Labor can be unpredictable. That's why moms need an environment where they can feel safe. They can come to YVMC and know they are getting the best care and that we can handle any situation that comes our way."
