

Extraordinary People

... personalized care

*"Chemotherapy is a daunting experience, full of fear and anxiety. Terri always explained what was going to happen and how I was going to feel. Her humorous outlook constantly cheered me up."
– A grateful patient*

Treating cancer and chronic illnesses is a team effort at YVMC. When coordinating a patient's plan of care, Terri pays special attention to individual emotional needs.

Terri says, "Oncology is definitely my calling. I get to know each patient as a person and develop a strong bond. The reward is knowing I've helped to make a difference by providing information and a safe, comfortable, relaxed environment."
