

Extraordinary People

... personalized care

*"Our vacation didn't go exactly as planned, but Will certainly picked the best place for his cardiac arrest. Jane, I want to thank you for being there, calm and knowledgeable, to reduce the trauma and confusion for me. Will is doing great – again, thanks for being there for me and so many others."
— A patient's wife*

"As a case manager and patient advocate, I have an opportunity to build personal relationships with patients and families by addressing their medical, spiritual, financial and cultural needs. In concert with the YVMC care team I strive to minimize the stress that could be felt during a patient's hospital stay and ensure the smoothest transition possible."
