

Extraordinary People

... personalized care

"Tamara made sure I understood what was happening throughout my joint replacement surgery and came to see me each day that I was in the hospital. Her follow-up phone call after I'd gone home was full of care and concern."

— a grateful patient

As coordinator of YVMC's Joint Replacement Program, Tamara provides personalized care to every patient, from the first pre-operative contact through surgery and into recovery.

Tamara says, "I love being able to help people. It is so important to provide education, because this surgery is a major event in someone's life. Every patient is special. My job is to see that our entire Joint Replacement team meets each patient's individual needs."

Tamara Floyd, RN
Spine/Joint Replacement Program Coordinator
