

Extraordinary People

Tina Livingston, RN, CRNI
Infusion/Chemotherapy Center

... personalized care

Tina Livingston has made the rounds in various departments throughout her 19 years at YVMC, so she can say with absolute certainty that Infusion and Chemotherapy is her favorite place. It's a job that has brought her both laughter and tears.

Tina says, "People think it must be awful coming here, but it's really not doom and gloom. We keep it light. It might surprise some people that cancer and humor go together, but we joke with each other.

"Patients come here full of hope. They want remission and of course we want that too, and although we're not able to cure them 100 percent of the time, we are able to give them additional time and a bit more quality."
