

Extraordinary People

... personalized care

Every time Victoria leaves the pharmacy with medications in hand, she is focused on patient safety and healing.

Victoria says, "Our pharmacists are a vital link in the healing process and providing personalized care. They triple-check every medication before it goes to our hospital patients or Doak Walker Care Center residents. I'm very proud of the system we have in place to prevent medication errors.

"My job is to assist the pharmacist as priorities evolve. I also do dated inventory control, drug searches and billing. Delivering medications takes me to many hospital departments, all of which uphold the quality of care YVMC stands for."

Victoria McGuire, CST
Lead Pharmacy Technician
